

# ABSTRACT OF THE DISCLOSURE

5 A method and an apparatus for manufacturing an  
image displaying apparatus having a display panel are  
provided. A first substrate of the display panel on  
which phosphor exciting means is disposed and a second  
substrate of the display panel on which phosphors  
emitting light by the phosphor exciting means is  
provide are prepared under the vacuum atmosphere.  
Then, the first and the second substrates are carried  
10 in a getter processing chamber or bake processing  
chamber, and getter processing or bake processing is  
applied thereto under the vacuum atmosphere. After the  
processing, the first and the second substrates are  
carried in a seal processing chamber, where the  
15 substrates are heat sealed under the vacuum atmosphere.  
Thus, reduction of vacuum exhaust time and a high  
vacuum degree in manufacturing an image displaying  
apparatus is attained and efficiency of manufacturing  
is improved.
